Hi Diana,

Can you get the company to write in an email today that the tanks have passed the inspection, or it not, what repairs need to be made? Thanks.

Darla

Hey Darla,

I wont be able to get the report from the inspection that happened on Wednesday. This is the update I received from the company that was out here.

Diana,

The full report includes tank details, observations, inspection items, a photo log, and comparisons to applicable fire code regulations. That last part takes a bit of time to get right. We'll need at least a few more days to wrap things up on our end.

Thanks,

Cody Paul

Hey Cody,

I was just checking in to see if you had the results from the tank inspection yet? or when I could expect to get those?

Thank you,

Diana

Diana,

Our inspector has requested that he be onsite on Wednesday to start instead (and wrap up on Thursday). Just checking in to make sure that'll work.

Also, a couple of quick questions as we plan for the site visit this week:

- Are the tanks fully accessible for tank wall thickness testing (especially along the bottom)?
- Similarly, are the tank walls clean enough for us to use our scanning device along the bottom? Any built-up debris, mud, or other materials would need to be removed.
- Do we need to bring ladders for the tops of the tanks, or are they otherwise accessible?

Thanks,

Cody Paul

Yes either or both of those dates will work for me. Please let me know if I need to have anything done prior to your arrival.

Thank you
